# MEME INFORMATION

## *¿Who is Natty?*

Natty is born as a natural fitness meme who will work to achieve an exceptional physique without steroids; he's not that kind of person.  
Natty is going to surprise his fitness community... ¿are you going to miss it?

## *¿Why should I join the Natty Army?*

This meme project is specifically designed to create the largest fitness community in the entire crypto sector. Thanks to this, the community itself will benefit from a quality project, secure and with very interesting initiatives. The main objective is to create an inflationary token that increases in value over time, activate the anti-whale plan (greatly reducing the chances of dumps), attract a healthy audience through a carefully planned marketing strategy, and with an impeccable token airdrop system that has never been proposed in the crypto sector.

There is only one man capable of completing this challenge, his name is Natty.

## *¿What is Natty's purpose?*

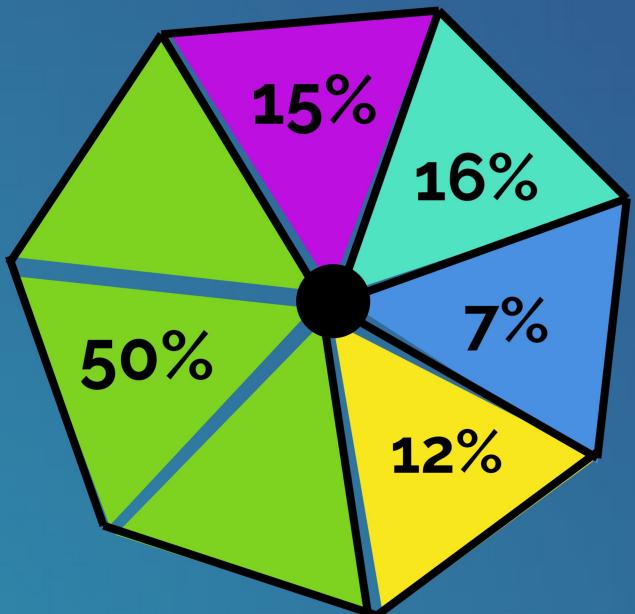

Natty will start as a natural fitness meme, but his goals are very ambitious; he knows no limits. Come hell or high water, he will fight to make his token recognized throughout the fitness industry and accepted as a form of payment in gyms, sport stores, supplement shops, etc. Their most ambitious goal will be to open their own gym where FITC holders can train for free for life .All structured by a well-thought-out plan.

What could go wrong?

"Your body is your greatest investment"

# TOKENOMICS

**IN THE EARLY STAGES OF THE PROJECT , CERTAIN PARAMETERS WILL BE  
CONSIDERED TO INCREASE THE DIFFICULTY FOR WHALES TO ACQUIRE FITC.**

- Total Supply (100%) : 150,000,000,000 FITC
- Public Sale (50%): 75,000,000,000 FITC
- Marketing (15%): 22,500,000,000 FITC
- Presale (16%): 24,000,000,000 FITC
- Airdrops (7%): 10,500,000,000 FITC
- Nattys Team (12%): 18,500,000,000 FITC

*The tokens will be gradually added to the liquidity pool to ensure an optimal token price at the beginning of the project. This will guarantee a higher price in the public sale than in the pre-sale, thus avoiding potential bulk purchases at very low prices*

*The project has a promotion system that will generate income allocated to airdrops to the community holders.*

*Team Natty Tokens will be locked for a minimum of 1 year and will partially unlocked over time.*

*The funds allocated for marketing will be used to promote the project, list it on different CEX and DEX , and everything related to advertising for the project.*

*There will be community voting on certain marketing and airdrops matters on the Discord Community, so that the community can decide on some of the projects we propose*

# ROADMAP

Natty's roadmap will be updated periodically, adding the next premeditated steps.

## 2024

### Q3

- Create FITC Token
- Start Presale
- Start Marketing Program
- 100.000 USD market cap
- Start Public Sale
- Reach +500 members Discord
- Start Airdrop Program

## 2025

### Q1

- CoinMarketCap Listing
- Start Marketing v2
- Rewards for Holding System
- 1 Million Market Cap
- +2000 Discord Members

### Q4

- 200.000 USD Market Cap
- +1000 Discord Members
- Start Affiliate Program
- Start Airdrop Affiliate Program
- Enable FITC in another networks
- 500.000 USD Market Cap

### Q2

- Tier2 CEX Listings
- 2Million Market Cap
- +5000Discord Members
- Start Fitness Collab Program
