TOKENOMICS

IN THE EARLY STAGES OF THE PROJECT, CERTAIN PARAMETERS WILL BE CONSIDERED TO INCREASE THE DIFFICULTY FOR WHALES TO ACQUIRE FITC.

- Total Supply (100%): 150,000,000,000 FITC
- Public Sale (50%): 75,000,000,000 FITC
- Marketing (15%): 22,500,000,000 FITC
- Presale (16%): 24,000,000,000 FITC
- Airdrops (7%): 10,500,000,000 FITC
- Nattys Team (12%): 18,500,000,000 FITC

The tokens will be gradually added to the liquidity pool to ensure an optimal token price at the beggining of the project. This will guarantee a higher price in the public sale than in the pre-sale, thus avoiding potential bulk purchases at very low prices

The project has a promotion system that will generate income allocated to airdrops to the community holders.

Team Natty Tokens will be locked for a minimum of 1 year and will partially unlocked over time.

The funds allocated for marketing will be used to promote the project, list it on different CEX and DEX, and everything related to advertising for the project.

There will be community voting on certain marketing and airdrops matters on the Discord Community, so that the community can decide on some of the projects we propose
